

pssRecruit

A Job Board for Your Web Site

<http://www.pssRecruit.com>

pssRecruit is the job board application for any organization that wants to recruit employees, directly. PssRecruit meets the requirements of private, niche, and specialized organizations better than the mainstream job boards (hotjobs.com, etc.). pssRecruit is a Web-based database system to give your recruiters the flexibility of working from anywhere, anytime. Applicants find and apply for your positions from your web site - not someone else's. pssRecruit provides your organization a private Web-based job board easily, quickly and cost-effectively.

pssRecruit is easy to install, administer and use. Your webmaster installs the application on your company's web site and adds user credentials for your recruiters. The recruiters access the application using their favorite web browser to add job postings. Potential applicants find the listings using a link to the application from other pages on your web site. The whole system is administered using a web browser; this means no training requirement. There is no complicated database interface to learn.

pssRecruit is sold in three licensing options. Single user is for the organization that has a small recruiting staff who will rely on one individual to make job postings to the web site. The 5-Client license is for the organization with up to five recruiters who will all be managing their own postings to the company web site. Finally, the Unlimited Client license is for the larger enterprise or recruiting firm that has more than 5 recruiters managing job postings on the web site. This is a one-time cost. Unlike many recruiting services there are no monthly or per-use fees.

Single Recruiter - \$1000
5-Client License - \$1500
Unlimited License - \$3000

The pssRecruit software manual, customization tips and FAQ are available on line at www.pssRecruit.com. FREE support for pssRecruit is provided via email. Progressive Software Solutions, LLC is a provider of Web-Based Business Solutions. For organizations with a limited IT staff, an installation service is available or PSS can host the application for you.

Forward Looking Companies Use:

pssRecruit is available for most operating systems. Because it runs from your web site there is only one operating system to worry about - any web browser can be used to read or add postings. To install, you must have access to your web site's executable directory. Minimum disk space required is 1.2 mb, not including the space for postings.
